

# **AIR VELOCITY AND TEMPERATURE TRANSMITTER IVL 02**

IVL 02 air velocity and temperature transmitter is made for HVAC applications. Output signals are corresponding the air flow velocity and temperature inside the ventilation duct.

Transmitter is to be mounted in the duct, on a place where the air flow is as laminar as possible. At the commissioning both outputs can be selected either milliampere or voltage outputs (see the jumper table below).

IVL 02-N is like IVL 02, but with a display cover (m/s and  $^{\circ}$ C). All models are also available with a 100 and 400 mm long stem.

Display is scanning between velocity and temperature and it can be fixed to show either velocity or temperature by loosing the jumper on back of the display board.

# **AIR VELOCITY AND TEMPERATURE TRANSMITTER IVL 10**

IVL 10 air velocity and temperature transmitter is made for HVAC applications. Output signals are corresponding the air flow velocity and temperature inside the ventilation duct.

Transmitter is to be mounted in the duct, on a place where the air flow is as laminar as possible. At the commissioning both outputs can be selected either milliampere or voltage outputs (see the jumper table below).
